Professional Summary

Full Stack JavaScript Developer with 3+ years of experience building modern, interactive, and high-performance web applications using React.js, Next.js, TypeScript, and Node.js. Skilled in developing real-time systems (WebSockets), messaging apps, CMS platforms, and admin panels. Focused on scalability, clean code practices, and agile collaboration.

Technical Skills

- Languages & Technologies: JavaScript, TypeScript, HTML5, CSS3, Node.js, SQL, NoSQL
 - Frameworks & Libraries: React.js, Next.js, Express.js, Nest.js, Redux, Socket.io, TailwindCSS, MUI, Mantine
 - Databases: MongoDB, MySQL
 - Tools: Git, GitHub, Figma, Vercel, npm, yarn, Jira
 - Methodologies: Agile, Scrum, Pair Programming
 - Others: Responsive Design, REST APIs, WebSockets, UI/UX Design, Basic Testing
-

Work Experience

Full Stack Developer

Nolatech — Jan 2023 – Present

- Developed multiple admin panels (CMS/HUB) using React.js, Next.js, Redux, MUI, and Mantine to manage critical application data, including user moderation tools for handling bans and irregular behavior. - Designed and built animated landing pages, increasing conversion rates by 40%. - Created a real-time messaging app from scratch using React.js, Tailwind CSS, Socket.io, and React Query, featuring: - One-to-one and group chat systems. - Multimedia sharing (images,

videos, supported files). - Real-time polls, location and contact sharing. - Browser push notifications. - Local message storage with `localStorage` to enhance load speed. - Improved legacy project performance by 50% through modularization and component optimization. - Built reusable component libraries to accelerate development of management systems. - Actively contributed to code reviews and participated in pair programming sessions. - Designed and consumed various API endpoints for administrative systems.

Full Stack Developer (Freelance)

Dec 2021 – Dec 2022

- Full-cycle development with React, Next.js, Node.js, MongoDB, and MySQL. - Led projects from scratch, ensuring performance and clean architecture. - Key project: Ultrabodegón – built inventory management and checkout system. - Optimized load time by up to 15% and implemented fully responsive UI for web and mobile.

Education

Computer Engineering Bootcamp — Platzi — Feb 2023

Electrical & Electronic Engineering — UNEXPO Puerto Ordaz — 2018–2021 (incomplete)
